

Staffing Services

With Apex's Staffing Services, you get affordable access to the resources you need to expand your business, increase your profits and meet the demand for on-site technology services. Our recruiting and placement services will locate trained personnel for a project-based, temp-to-hire or direct-placement basis.

- Are IT projects creating work-load peaks beyond your current capabilities?
- Do you need specialized IT skills, but only for a limited time?
- Would you like help finding, attracting, qualifying, and hiring full-time employees or contractors?
- Is your business growing rapidly? Is your core business something other than IT?

If you answered "yes" to one or more of these questions, your company will value working with Apex to help with your contractor and staffing requirements. It makes sense to have IT experts hire and place IT staff. Many HR and IT departments use Apex to provide a turnkey staffing services program. We place quality IT personnel at lower prices — and we do it faster and better than IT "body shops".

Apex has helped many clients with staffing services, including: Lockheed Martin, Bank of America, Boeing, Boston Beer, PacificCare, Thermo Fisher Scientific, Sony Pictures, SAP, Webster Bank and WellPoint Health Networks.

Apex's reputation is at stake when we place an independent contractor or FTE into a client's environment. We're picky and won't offer any resources to clients that we wouldn't consider hiring ourselves. Apex provides faster response, experience-based qualifying and competitive pricing because we have technicians, engineers and project managers who participate as a team for each placement. Just provide your location, a job description or list of skill requirements, budget targets, and we'll handle the rest. This leaves you free to focus on your core business!

Our placement assignments have included project management, design, installation and administration for Cisco, Microsoft, Unix, EMC, Avaya, Nortel, Aruba, Juniper and CheckPoint.
